PROFESSIONAL SUMMARY

Senior Product Designer with 7 years shipping enterprise B2B and startup consumer products in fintech, reinsurance, security and health. Built the GC Design System from zero at Marsh McLennan; ship native iOS and macOS apps as side projects. Looking for fully remote roles where design works close to engineering on AI-native and B2B SaaS products.

WORK EXPERIENCE

Falda | Senior Product Designer September 2025 – Present | Remote

- Provide end-to-end product design for early-stage SaaS founders in AI, fintech, security, and health, covering dashboards, onboarding flows, marketing sites, and design system foundations
- Build component libraries and tokens in Figma so client teams can scale UI consistency post-engagement, and ship Framer / Webflow marketing sites with CMS-ready handoff
- Ship native iOS and macOS apps as design + engineering exercises exploring AI, transcription, and on-device ML (see Selected Projects)

Marsh McLennan | Senior Product Designer October 2023 – August 2025 | Princeton, NJ

- Owned end-to-end product design across 7 enterprise applications used daily by global teams in reinsurance, risk, and finance operations, balancing complex regulatory requirements with usability
- Built and scaled the GC Design System from zero in Figma and Storybook on a MUI foundation, adopted by 5 application teams and reducing new-project startup time by 60%
- Shipped the BSA Tracking Tool from concept to production in under 2 months, replacing a manual spreadsheet workflow now used daily by internal teams of 200+ users
- Led WCAG 2.2 AA compliance across all applications, including documentation and reusable React component patterns handed off to development teams
- Partnered closely with PMs, business analysts, and React / Next.js engineers to ensure pixel-accurate design-to-code handoff, and conducted technical interviews for offshore product design hires across company verticals

Moment Studio | Product Designer January 2022 – August 2023 | Remote

- Designed end-to-end experiences for B2B fintech and SaaS clients (dashboards, payment flows, and onboarding journeys), improving user engagement by 40% and mobile usability by 35%
- Built design systems and brand component libraries in Figma to support clients scaling from MVP to product-market fit
- Led prototyping and design reviews to align developers and stakeholders before development cycles, reducing rework

ALAT by Wema | Product Designer March 2019 – December 2021 | Remote

- Designed 12+ feature releases for the ALAT iOS mobile banking platform serving millions of daily users
- Increased core task completion rate by 67% by redesigning onboarding, payment, and loan application flows
- Boosted engagement by 32% by simplifying task flows and information architecture across core banking surfaces, supported by usability research and behavioral insights presented to product and exec stakeholders

EDUCATION

Afe Babalola University | Bachelor of Engineering - Major in Petroleum Engineering

SKILLS

Tools: Figma, Framer, Figjam, Webflow, Storybook, SwiftUI, React, MUI, Cursor, Claude Code

Practice: User Research, Design Systems, Accessibility (WCAG 2.2 AA), A/B Testing, HTML/CSS, Agile/Scrum, Cross-Functional Collaboration, Prototyping, Wireframes, End-to-End Product Design, Design-to-Code Handoff, Product Strategy, Usability Testing
